RE: UCMR 5 Sampling Results Available to View

PWS ID: IL0311050
PWS Name: GLENWOOD

Dear Public Water System,

Sampling results for U.S. EPA's Fifth Unregulated Contaminant Monitoring Rule (UCMR 5) are available for your public water system (PWS) in the Safe Drinking Water Accession and Review System (SDWARS 5). You received this automated email notification because you are registered for a SDWARS 5 account for this PWS. You will receive a notification each time new results become available.

If your results show that an unregulated contaminant was found, please review the Health-Based Reference Values for UCMR 5 document for context around UCMR 5 results in relation to EPA established minimum reporting levels (MRLs) and available health-based reference values. For example, the Agency established health advisory levels for four of the 29 per- and polyfluoroalkyl substances (PFAS) being monitored under UCMR 5. EPA's health advisories are non-enforceable and non-regulatory. EPA encourages early communications with your State and customers about results above an EPA health advisory and to determine if your PWS is subject to unique State requirements. When considering notification options for your customers, please be aware of the established Tier 3 Public Notification [40 CFR 141.207] and Consumer Confidence Report (CCR) [40 CFR 141.153(d)(7)] requirements (see **Next Steps** to learn more).

The new results are provided below. Resamples associated with this dataset may be in process. Results may not be available for a particular analyte or method if multiple resamples have been issued and the resample window has closed, or an issue at the laboratory precludes successful analysis.

Sample Event Code/Sample Schedule	SE1	Jan 2024
Facility ID/Name	Connection to Hammond	10001
Sample Point ID/Type/Name	EP1 EP	Sample Tap @ POE

Sample Kit ID	Method ID	Analyte Name	Collection Date	Reported Value(µg/L)
111853P	EPA 200.7	lithium	1/10/2024 12:00:00 AM	<9
